

11 / YOUR POS. YOUR CHOICE.

Keep your POS. Or let us provide Boss It.

You do not need to replace your POS to use Maistro. Connect your existing system where an integration is available, or choose the Boss It POS we provide. We bring your tools and data together so you can use Maistro to forecast, plan and manage your business.

Already have a POS?

Maistro integrates with Square, so you can connect it without switching to our POS. Using another provider? Introduce us and we can assess an integration together, including which data and workflows can be connected.

Need a POS? We can provide Boss It.

If you need a new POS or are starting from scratch, we can provide Boss It. We can also supply the connected tools you need, including kiosks, kitchen displays, online ordering and driver management, as part of the agreed setup.

Start with what matters most

Tell us how many venues you run, the tools you use and where you want to improve first: stock costs, staffing, phone orders, direct sales or visibility across the group. We will work with you to choose the Maistro modules and connections that fit.

Connect, test and roll out

Together, we agree the integrations, equipment, data preparation, training, support, pricing and timing. Then we test the real service workflow with your team before expanding across the business.

Square integration is available. Connections to other POS providers are assessed individually; scope and rollout are agreed with you and your provider.
