

06 / DIGITAL MENUS & SIGNAGE

Screens that follow the sales picture.

Digital menus connect to your POS and AI. Schedule menus, change prices and pause products from the POS, while AI uses sales at different times and on different days to inform menu and order scheduling.

Control the menu from the POS

Schedule menus, change a price or pause a product from the POS. Keep customer-facing digital menus connected to the operation, so the screens reflect what you want to sell.

AI-led menu and order scheduling

AI uses the sales picture to inform menu and order scheduling. Timing is based on how sales vary across different parts of the day and different days of the week.

Different times. Different trading patterns.

Lunch on a weekday and service at the weekend may have different sales patterns. Maistro uses sales at those different times and days to shape scheduling, rather than treating every trading period as identical.

We'll walk through menu and order scheduling using your POS, sales patterns and screen setup.

€2.50

Same great flavour. Later.

GOOD FOOD BRIGHTER NIGHTS

Tips for great results

Use high contrast for clear readability

Place price areas over the final prices

Keep key text and prices within safe margins (1920x1080)
